CAREER OBJECTIVE

Adaptable professional with 10+ years of experience and a proven knowledge of carrier/logistics management, contract transportation services, and application development. Aiming to leverage my skills to successfully fill the Developer role at your company.

SKILLS

PHP, MySQL/MariaDB, MSSQL ,CentOS, SOAP Web Services, EDI 210/204/214/997/990/110, Java script/ HTML, Userspice/Userpie, REST APIs

WORK EXPERIENCE

Transportation Specialist's Group   Suwanee, GA
Lead Developer   *Jan 2013 – Present*
- Create and maintain a freight audit payment platform backend and frontend. Reducing cost to outside vendors and bringing the flexibility of owning our own audit.
- Develop and maintain a full in house EDI Suite (210,204,214,997,990,110). Removing reliability on outside EDI house.
- Design and deploy customer facing BI, and freight management tools to compete in the market.
- Responsible for training and management of all users in developed tools.
- Design, build, or maintain web sites, using authoring or scripting languages, content creation tools, management tools, and digital media.
- Setup and manage full LAMP stack (Linux, Apache, MySQL and PHP) for in house applications.
- Consult with customers or other departments on project status, proposals, or technical issues, such as software system design or maintenance.
- Assign, coordinate, and review work and activities of programming personnel.

Print Advantage   **Duluth, GA**
Web Developer   *Dec 2007 – Jun 2012*
- Created and Maintained a Successful Web Store
- Created Web Sites for Multiple Real Estate Properties
